WALDEN GREEN ENERGY AND RWE SUPPLY & TRADING PARTNER TO DEVELOP RENEWABLE ENERGY PROJECTS IN THE AMERICAS

New York, March 16, 2015. Walden Green Energy (“Walden”) announced an equity investment by RWE Supply & Trading (“RWE”), the energy trading arm of the European utility. RWE’s investment will facilitate the expansion of Walden’s renewable energy project portfolio across North America, with the potential for further expansion of the partnership into other regions including Central and South America.

Andree Stracke, Member of the Board of RWE Supply & Trading commented: “We’re excited to be supporting Walden’s expansion. The Walden team brings a rich experience in financial markets and renewable project development. They are disciplined, versatile, and presented a vision for the business that we found extremely compelling.”

Regarding the geographic focus of the partnership, Stracke said, “Our initial focus with Walden will be North America in order to significantly scale and leverage Walden’s existing project pipeline. That said, global opportunities continue to evolve and the Walden team has proven adept at identifying outstanding investments. We look forward to expanding our partnership in the future.”

“We are excited to work with RWE, a firm with extensive global energy experience and a substantial track record in clean energy generation. Our partnership with RWE represents a validation of our approach.” Said Henry Weitzner, co-founder of Walden. “We founded Walden to harness the exponential growth in renewables as they become an ever more important part of the energy mix. This creates an opportunity for significant long-term value creation through strategic, thoughtful investment. Our partnership with RWE furthers our goal to take advantage of this opportunity and others that will emerge as the renewables sector evolves.”

About Walden Green Energy

Walden Green Energy is a global renewable energy company, co-founded by George Manahilov, Sarah Valdovinos, and Henry Weitzner to develop and operate clean power facilities in the US and high growth regions around the world.

Walden believes having a diversified portfolio is critical to capturing growth, generating attractive returns, and creating long-term value. Our strategy is to develop, own, and operate power plants using proven technologies that optimize the domestic renewable natural resources of the markets where we invests – e.g. wind, waste-to-energy, ‘run-of-the-river’ hydro, and PV solar.

We strive to balance sustainability with returns and to create positive social impact by delivering cost efficient, clean power to regions with rapidly growing energy demand.

About RWE Supply & Trading

RWE Supply & Trading is a leading European energy trading house and is the interface between the RWE Group's operating companies and global wholesale markets for energy and energy-related raw materials in both their physical and/or derivative forms. This includes power, gas, coal, freight, oil, weather derivatives, biomass, emissions certificates and renewable energies. RWE Supply & Trading is responsible for the economic optimisation of power generation and the entire non-regulated gas business of the RWE Group, including all procurement, storage and LNG-related activities. Large industrial companies and trading partners are offered long-term delivery concepts by RWE Supply & Trading next to a trading-based portfolio management. The headquarters in Germany boast Europe's largest energy trading floor, complementing the network of additional trading floors in London and Swindon, as well as the subsidiary, affiliate and branch offices in Den Bosch, Geneva, Prague, Singapore, New York, Mumbai and Jakarta.
